ELEVATOR PITCH DECK

The Next-Gen Living RPG(demo)

Multiplayer voice-first tabletop adventures powered by autonomous real-time AI Game Masters.

Chao Chen
Founder & Product Lead

VOICE-FIRST • ZERO RULES FRICTION • PLAY ANYWHERE

EXERCISE 1 • PROBLEM VALIDATION

The Tabletop Paradox

80%

Interested players cannot play regularly

TRPGs provide peerless social storytelling, yet systemic logistical barriers abandon millions of potential campaigns worldwide.

Forever DM Dilemma

Running games requires hours of homework, creating chronic Game Master shortages.

Scheduling Nightmares

Coordinating 4–5 busy adults for 4–hour sessions leads to abandoned party campaigns.

Rulebook Intimidation

300–page manuals and performance anxiety push beginners back into rigid video games.

EXERCISE 2 • SOLUTION ARCHITECTURE

The Real-Time Voice AI Game Master

Voice-First Agency

Speak naturally without menus. The AI calculates dice checks and arbitrates outcomes instantly.

Adaptive Audio

Dynamic spatial soundscapes, monster roars, and NPC voice synthesis ignite theater-of-the-mind.

Lightweight 2D HUD

Real-time battle maps, inventory tracking, and party status on mobile without device overheating.

EXERCISE 3 • TARGET PERSONAS

Who Benefits & How They Win

SEGMENT 01

The Busy Veteran

Core TRPG Players (Ages 20–35)

Primary Benefit:

Zero preparation homework. Hop into a 30–minute dungeon run during lunchbreaks without scheduling a human DM.

SEGMENT 02

Intimidated Beginner

Gen Z / Casual Gamers (Ages 16–25)

Primary Benefit:

Zero rulebook barrier. Speak naturally with friends in a judgment-free, voice-only private environment.

SEGMENT 03

Narrative Seeker

CRPG & Fiction Fans (All Ages)

Primary Benefit:

True creative freedom. Bribing guards or improvising spells actually works—no scripted dialogue wheels.

EXERCISE 4 • STARTUP TRACTION

Accomplished So Far & Near-Term Goals

Architecture Validated

Multi-modal voice pipeline with real-time prompt orchestration benchmarked successfully.

Market Need Confirmed

Qualitative interviews with TRPG players verified scheduling and DM shortage as top pain points.

Alpha Readiness

Core web prototype ready for closed group testing with automated dice rolling and dynamic sound.

ALPHA TARGETS (NEXT 90 DAYS)

50 Multi-User Playtest Parties • Voice Latency < 800ms

> 75%
Completion Rate

> 1.2
Viral K-Factor

EXERCISE 5 • CAPITAL ALLOCATION

The Ask & 12-Month Execution Roadmap

Pre-Seed Ask: $150,000 CAD
Seeking strategic mentorship & gaming advisor networks via Seneca HELIX

12-MONTH HORIZON
Cash-Flow Breakeven Ready

M 1–3 • $30K
Closed Alpha
Benchmark latency under 800ms; complete 50 party campaigns.

M 4–6 • $40K
Public Beta & Bot
Web & iOS beta; Discord bot launch; scale to 5,000 MAU.

M 7–9 • $40K
Pro Monetization
Launch $9.99/mo Pro sub; reach 25K MAU and 1,000 paying users.

M 10–12 • $40K
Marketplace Scale
Creator revenue sharing; 100K users & $25K+ monthly recurring revenue.

SENECA HELIX VENTURE LAB • THE PITCH

Unlocking Endless Imagination

Bringing tabletop roleplaying to millions through real-time conversational AI. Let's build the future of collective storytelling together.
