

Mobile AI Voice TRPG: Business Model Canvas & Strategic Vision

Bringing Tabletop Role-Playing to Mainstream Gamers Through AI Voice & Light Mobile Visuals

PRESENTED BY: PRODUCT STRATEGY TEAM

Targeting the Real Blue Ocean

Capture mainstream gamers, don't replace hardcore veterans.

Strategic Focus

Core Positioning

Avoid competing for **hardcore tabletop veterans** with established groups.

Primary Target

Capture the massive **mainstream gamer audience** fascinated by deep lore and story-rich CRPGs like **Baldur's Gate 3**.

"Unlocking storytelling for millions who love RPG mechanics without TTRPG friction."

3 Barriers to Entry

1. Intimidating Rulebooks

Hundreds of pages of complex rules, calculations, and character stat management.

2. Social Hurdles

Schedule coordination conflicts and finding a reliable Game Master (DM).

3. Roleplay Stage Fright

Anxiety speaking and acting in front of strangers in live group sessions.

Target Segments

Anime Enthusiasts

Single-Player CRPG Gamers

Interactive Fiction Fans

Solo Narrative Players

PRODUCT PHILOSOPHY: INVISIBLE RULES, MAXIMUM IMMERSION

Hide the tedious rules, amplify the fun and creativity.

"Hide the tedious rules, amplify the fun and creativity."

AUTOMATED BACKGROUND MECHANICS

- Dice math, modifier tables, stat tracking, and inventory run silently in system backend.
- AI calculates outcomes and applies buffs/debuffs in real time without manual cross-referencing.

FRONT-FACING PLAYER EXPERIENCE

- **Unfiltered narrative freedom:** Speak any action and the system translates it into mechanical checks.
- Heart-pounding 3D dice rolls on screen paired with dramatic, voice-acted AI DM storytelling.

WHAT MAKES THE PRODUCT UNIQUE?

Core Value Propositions & Gameplay Features

CORE FEATURE 01

INSTANT AI DUNGEON MASTER

- 24/7 availability with zero prep time.
- Never cancels sessions or suffers from DM burn-out.

CORE FEATURE 02

MULTI-VOICE EMOTION ENGINE

- Distinct AI voices for every NPC with dynamic emotional tone adjustment.
- Reactive background audio and atmospheric sound effects during combat/exploration.

CORE FEATURE 03

LIGHT MOBILE VISUALS & FLEXIBLE PLAYSTYLES

- One-handed vertical phone screen layout featuring 2D anime art & 3D dice physics.
- Seamless solo play or 1-3 player co-op with AI managing all DM duties.

THE BUSINESS MODEL CANVAS AT A GLANCE

9 Core Building Blocks Architecture

8. KEY PARTNERS

- Cloud & AI providers
- Tabletop module authors
- Voice talent
- App store platforms

7. KEY ACTIVITIES

- Agent tuning & hallucination prevention
- Latency reduction
- Modular quest writing
- Community tools

6. KEY RESOURCES

- Fine-tuned TRPG LLM
- Low-latency TTS/STT pipeline
- Modular rules engine
- Mobile app framework

2. VALUE PROPOSITIONS

- ★ Zero-friction AI DM
- ★ Emotional voice acting
- ★ Mobile light visuals
- ★ Total story freedom

4. CUSTOMER RELATIONS

- AI companion with long-term memory
- Safe space for roleplay
- UGC community

3. CHANNELS

- Social media clip virality (TikTok, Bilibili, YT Shorts)
- TapTap & app stores
- VTuber streams

1. CUSTOMER SEGMENTS

- Anime fans
- TRPG spectators
- CRPG & story gamers
- Solo players

9. COST STRUCTURE

- AI model inference (tokens & audio)
- Art/audio assets
- Engineering team
- Marketing & UA

5. REVENUE STREAMS

- Monthly Adventure Pass (Subscriptions)
- Dice/avatar cosmetics
- DLC story modules
- UGC revenue share

How the Platform Makes Money

Monetization Strategy & Revenue Architecture

RECURRING SUBSCRIPTION

Adventure Pass

- **Unlimited high-speed AI voice chat** (lowest latency).
- **Premium NPC voice packs** & exclusive monthly quests.

EPISODIC TRANSACTIONS

Modular DLC Packs

- **30-45 minute** themed campaign modules.
- **High Fantasy, Cyberpunk,** and Lovecraftian Mystery launch packs.

COMMUNITY & MARKETPLACE

Cosmetics & Marketplace

- **Collectible 3D dice skins**, roll animations, character portrait generators.
- **Third-party creator marketplace** with revenue share for user-authored scenarios.

Overcoming Key Operational Challenges

Strategic Execution: Cost & Experience Balance

CHALLENGE 1: AI COMPUTING & TOKEN COSTS

Problem: High compute and voice inference costs for continuous streaming.

CHALLENGE 2: NARRATIVE CONSISTENCY VS. FREEDOM

Problem: Pure LLMs risk hallucinations and story derailment.

SOLUTION: TIERED MODEL & HYBRID ROUTING

Strategic Execution:

- **Free Tier:** Free core text tier + daily free voice credits
- **Subscription:** Premium unlimited subscription
- **Hybrid Model Routing:** Light models for banter, heavy models for narrative branches

SOLUTION: HYBRID STATE MACHINE + LLM

Strategic Execution:

- **Core Architecture:** Hybrid State Machine + LLM architecture
- **Guardrail Dynamic:** Rigid narrative milestones act as guardrails while AI freely improvises between checkpoints

SUMMARY & PATH FORWARD

Unlocking Tabletop Gaming for 100M+ Mainstream Gamers

EXECUTIVE SUMMARY

By transforming complex, math-heavy tabletop mechanics into an invisible, voice-driven mobile adventure, we unlock tabletop gaming for a **100M+ global audience** seeking deep narrative experiences.

100M+

GLOBAL TARGET AUDIENCE

1

PROTOTYPE CORE AI DM VOICE LOOP

Achieve sub-1 second latency target for natural voice conversations.

2

LAUNCH VERTICAL MOBILE ALPHA

Closed alpha release with one 30-minute starter scenario.

3

TEST SOCIAL VIRALITY

Export gameplay highlight clips (dice rolls, AI banter) to TikTok/YouTube Shorts.
